PREFACE

The Current List of Medical Literature is a monthly publication of the National Library of Medicine. Each regular number consists of three parts: a Register of Articles, a Subject Index, and an Author Index. The last (June or December) number of each semi-annual volume is a cumulation of the Author and Subject Indexes of the preceding five numbers.

Selection of Articles. Journals selected for inclusion in the Current List are derived from among about 5,000 current titles received in the National Library of Medicine from all parts of the world. The chosen titles represent clinical and experimental medicine and the ancillary biomedical fields. In the belief that some of the allied fields, such as dentistry, veterinary medicine and chemistry, are adequately covered by existing bibliographical services, the Current List restricts its coverage in these areas to selected major publications. The Current List indexes all original articles with no attempt at a critical selection. Occasionally, however, articles are not indexed if they fall beyond the scope of the National Library of Medicine; such omissions are indicated by an asterisk preceding the reference line of the journal issue.

Register of Articles. The Register is arranged alphabetically by journal title, the articles listed and numbered according to their appearance in the journal itself. The numbering of articles is begun anew with each volume of the Current List and continues through the five Registers of that volume. The full title of each journal appears in upper case as a caption. Directly under the title caption appears a reference line, which consists of the title abbreviation, volume and issue number, and the date of the publication of the particular journal piece. Both volume and issue numbers are given in arabic numerals, 23(2), for example, indicating Volume 23, Number 2. Each Register entry contains the authors, title and pagination of the article, foreign language titles being given in the original language and followed by an English translation.

Subject Index. The alphabetical Subject Index provides three levels of subject breakdown: a main heading, a subheading, and a sub-subheading, called the 'modification.' Main headings are those which appear in the Subject Heading Authority List originally published in 1954, revised in 1956, and again, in 1957. Subheadings are standard words or phrases representing concepts of frequent occurrence in biomedical literature and useful for purposes of subgrouping. The modification is derived from the article itself, and attempts to give within its limits an indication of the specific substance of the article. Each Subject Index entry contains a number which relates it to a Register entry.

Author Index. Every author credited by an article is listed in the Author Index by surname and initials related to a Register entry by a number. Articles about an individual, including obituaries, are listed in the Subject Index under the headings BIOGRAPHIES, OBITUARIES, and FAMOUS PEOPLES with the name of the individual as the modification.

Subject Headings. In general the words or phrases used for subject headings are those in common usage; wherever practicable, they agree with terminology employed by authorities in the various subject fields. Most subject headings conform to one of three general types: those defining unitary concepts, as the name of specific diseases (TUBERCULOSIS), organs (KIDNEYS), and chemical substances (LYSINE); those defining manifold concepts, as the names of organ-localized disease processes (TUBERCULOSIS, PULMONARY), physiological phenomena (BLOOD COAGULATION), surgical procedures (TEETH EXTRACTION); and those defining generic entities consisting of several related concepts (LIPOIDOSIS, RODENTS, ANTIHISTAMINICS). No limitation is placed upon the number of subject headings which may be utilized in indexing a single article.

Currency is a prime objective of this index. It is not uncommon, however, for actual publication of journals to lag months, and sometimes more than a year, behind the date of publication given on the issue. The receipt of foreign journals particularly is often delayed. Though journals are commonly indexed and published in chronological order, delay in receipt will postpone publication of later material only for a reasonable time. In such instances the Register of Articles carries notation of a gap in chronological sequence.

Recent United States Publications. Since the January 1957 issue of the Current List a new section, entitled Recent United States Publications, has been carried as a regular feature. Both monographic and serial titles imprinted in the United States within 18 months of the date of the issue of the Current List in which the entry appears are included. The entry itself consists of the complete National Library of Medicine Catalog entry, including classification, descriptive and subject cataloging to which price information--when available--has been added just below the call number. This service is located at the back of each regular monthly issue for easy removal.

11505 ASRATIAN E A Novye dannye o perekliuchenii v uslovnoreflektornoi deiatel'nosti. [Recent data on switch-over in conditioned reflex function] p. 305-12.

11506 SAMSONOVA V G Osobennosti differentsirovaniia razdrazhitelei pri vzaimodeistvii rannykh form dvigatel'nykh uslovnykh reaktsii na rannem etape ikh vyrabotki u vzroslogo cheloveka. [Characteristics of differentiation of stimuli during inter-action of various forms of motor conditioned reaction in early stage of their formation in adults] p. 313-21.

11507 ALEKSEENKO N IU Vzaimodeistvie odnovremenno osuschestvliaemykh uslovnykh reaktsii na zvukovoi razdrazhitel', vyrabotannykh na rechevom i bezusloivnom podkreplenilakh. [Correlation between simultaneously occurring conditioned reactions to sound stimuli produced on verbal and unconditioned reinforcements] p. 322-8.

11508 MERTYCHEVA L I Znachenie vremennoi kharakteristiki fonovogo svetovogo razdrazhenia dlia formirovania dvigatel'noi uslovnoi reaktsii na zvukovoi razdrazhitel' u vzroslogo cheloveka. [Significance of temporary characteristics of background photic stimulation in the formation of motor conditioned reactions to sound stimuli in adults] p. 329-37.

11509 BIRIUKOVA Z I Osobennosti dykhatel'nykh uslovnykh refleksov u zdorovogo vzroslogo cheloveka. [Characteristics of respiratory conditioned reflexes in normal adults] p. 338-45.

11510 SKORUNSKAIA T N Vzaimodeistvie signal'nykh sistem pri odnovremennom pred''iavlenii nesposredstvennogo i slovesnogo razdrazhitelei protivopolozhnogo znachenia. [Correlation between signaling systems during simultaneous presentation of indirect and verbal stimuli of contralateral significance] p. 346-52.

11511 MELESHKO S D O mekhanizmakh vzaimodeistviia signal'nykh sistem kory mozga. [The mechanism of interactivity of signaling systems of the cerebral cortex] p. 353-7.

11512 KRYLOV O A O sviazi izmenenii vysshei nervnoi deiatel'nosti i soderzhania broma v krovi u obez'ian (pavian gamadrilov) v ontogeneze. [Relation of changes of the higher nervous activity to blood bromine content in monkeys (Pavio hamadryas) in ontogenesis] p. 358-65.

11513 VYRBANOVA-ANGELOVA A V Patologicheski izmenennyi interotseptivnyi korkovyi punkt. [Pathological changes in the interoceptive cortical point] p. 366-71.

11514 MURAV'EVA N P K mekhanizmu ul'traparadoksal'noi fazy. [The mechanism of ultraparodoxical phase] p. 372-8.

11515 GAVRILOVA L N, LAPINA I A O dlitel'nosti sokhraneniia ochaga ostatochnogo vozbuzhdeniia v khimicheskom (rotovom) analizatore sobaki. [Duration of the preservation of the residual irritation focus in a chemical (oral) analyzer in dog] p. 379-83.

11516 SHEKOVA G I O nekotorykh osobennostiakh formirovania dvigatel'nykh oboronitel'nykh uslovnykh refleksov u sobak. [Effect of the higher nervous activity on blood sugar level] p. 384-92.

11517 JURJUA K, STRUNGARU G, DUMITRESCU E O zavisimosti urovnia protsessov vozbuzhdeniia i tormozheniia ot tonusa kory mozga. [The relationship between irritation and inhibition processes to tonus of the cerebral cortex] p. 403-9.

11518 KONIUKHOVA V A Sravnitel'naia otsenka razlichnykh metodik izucheniia vysshei nervnoi deiatel'nosti svinei. [Comparative studies on various methods of evaluation of the higher nervous activity in hogs] p. 410-7.

11519 GITIS E I Vliianie perelivaniia krovi i belkovogo krovozamestitelia BK-8 na vysshiu nervnuiu deiatel'nost' zhivotnykh (belykh krys). [Effect of blood transfusion and of protein plasma substitute BK-8 on the higher nervous activity in white rats] p. 418-30.

11520 TAGIEV SH K Sintez dvukh razlichnykh dvigatel'nykh uslovnykh refleksov v tsep' dvizhenii u ryb, golubei i krolikov. [Synthesis of two different motor conditioned reflexes into a chain of movements in fish, pigeons and rabbits] p. 431-6.

11521 VERZILOVA O V Izmenenie elektricheskoi aktivnosti kory golovnogo mozga sobaki v oblasti slukhovogo i dvigatel'nykh analizatorov pri obrazovanii i peredelke dvigatel'nykh oboronitel'nykh refleksov. [Changes of electrical activity of the cerebral cortex in the region of auditory and motor analyzers in dogs during the formation and alteration of motor defense reflexes] p. 437-48.

11522 CHENG C C, WANG K J Registratsiia sliunootdeleniia pri pomoshchi elektromekhanicheskogo pribora. [Registration of salivary secretion with the aid of electro-mechanical apparatus] p. 449-52.

11523 ALEKSEEV M A Nekotorye zamechaniia po povodu tochki zrenia P. K. Anokhina na afferentnyi apparat uslovnogo refleksa. [Considerations on P. K. Anokhin's views on the afferent apparatus of conditioned reflexes] p. 453-65.

LIST OF ABBREVIATIONS

Words ending in *-ology* and *-ological* are abbreviated in *-ol.* A compound word, the second part of which is capable of abbreviation, is itself abbreviated, as *cardiopulm.* for *cardiopulmonary.*

abdom.	abdominal, abdomen
abnorm.	abnormalities, abnormal
absorp.	absorption
acad.	academy
accid.	accidents, accidental
accomm.	accommodation
addict.	addiction
admin.	administration
agglut.	agglutination
AMA	American Medical Association
Amer.	American
anat.	anatomy
anesth.	anesthesia
antag.	antagonists, antagonism
appar.	apparatus
artif.	artificial
assoc.	association, associated
auric.	auricular
bact.	bacteria, bacterial
BCG	Bacillus Calmette-Guérin
bibliog.	bibliography
biochem.	biochemistry
Brit.	British
chem.	chemistry, chemical
circ.	circulation, circulatory
classif.	classification
clin.	clinical
